Overview

Living in Dublin, Ireland for four years. This was an incredible experience to reach out and expand on my future. From an early age I wanted to be surrounded with technology and the word of IT but I went in other direction and finished Chef school in Croatia and worked in the industry. At the end of 2017 I started to teach myself Web Development online. After 9 months of learning and working full-time I decided to leave my job and I applied for online school OpenClassrooms. Now focusing on learning full-time and looking for opportunities to develop even more. My portfolio is based on projects from school where I was able to improve my skills.

Technologies

During my study with OpenClassrooms I got to work with HTML5, CSS3, jQuery, Bootstrap, UML, MySql, Git, writing technical documentations and project briefs. My main focus at the moment is to get on solid level with JavaScript and to dive into some of its frameworks. In the future I would love to learn another programming language and explore different technologies.
